PHYSICAL REVIEW A, VOLUME 15(1)
Laser Isotope Separation: Separation of an Isotope
M. J. B. ...
Received ...
Published ...

1. INTRODUCTION
The separation of an isotope by a laser beam has long been a subject of interest to physicists and engineers alike. The first experimental demonstration of this process was made by ...

2. EXPERIMENTAL PROCEDURE
The experiment was carried out in a vacuum chamber of diameter 10 cm. The laser beam was directed at the sample through a series of lenses and mirrors. The sample was a mixture of ...

3. RESULTS AND DISCUSSION
The results of the experiment are shown in Figure 1. The separation of the isotope was observed to be a function of the laser intensity and the duration of the exposure. The separation was found to be ...

4. CONCLUSIONS
The results of this experiment show that laser isotope separation is a viable method for the separation of isotopes. The method is simple and can be used for a wide range of isotopes. Further research is needed to improve the efficiency of the process.
