The Theory and Practice of Teaching

Teaching, like learning, is one of the most basic human activities. As a skill and a vocation, teaching is essential to the lives of those who study and work in schools. This book offers a comprehensive and accessible introduction to the theory and practice of teaching. It is written for those who are beginning to study the subject, and for those who are already working in the field. The book is divided into two parts. The first part, 'The Theory of Teaching', explores the philosophical and sociological foundations of teaching. The second part, 'The Practice of Teaching', examines the day-to-day realities of the classroom. The book is written in a clear and engaging style, and is supported by a range of practical examples and case studies. It is an essential resource for all those who are interested in the theory and practice of teaching.

- The nature of teaching
- The ethics of teaching and learning relationships
- The knowledge-based teaching theory and the theory of teaching
- Teaching methods, including didactic, constructivist, and experiential, and reflective
- The social context of teaching

Combining theory and practice, this book offers a broad and multidisciplinary perspective on teaching methods. It will help teachers and learners in schools, higher further and adult education, plus teacher education and research students. It is also a valuable reading for anyone interested in the role of teaching.

Peter Jarvis is Professor of Continuing Education, University of Derby, UK and Adjunct Professor, Department of Adult Education, University of Georgia, USA. His other books include *Research Learning and Adult Education and Lifelong Learning*.
